Owosso, MI 48867

**NOTIFICATION - City DPW crews will be Hydro-Excavating in your neighborhood**

Dear Water Customer,

We will be examining Water Service Lines as part of our ongoing effort to identify, and replace all of the city's non-compliant service lines. This will be accomplished using a Hydro Excavator which uses high-pressure water to create a hole about 18 inches in diameter. The holes will all be backfilled with sand.

We will need to view the Water Service Lines both in the Right of Way, and on your property.

**City of Owosso DPW workers will also ask to see the water line, and identify the materials of the service line coming into your home.**

**Verifying the service line where it enters your home is a requirement of the State of Michigan EGLE.**

Should you need to schedule a visit at a more convenient time, please contact the Safewater phone number at 989-725-0545, or e-mail [safewater@ci.owosso.mi.us](mailto:safewater@ci.owosso.mi.us)

**Why Are You Receiving This Letter?**

Lead can cause serious health and developmental problems, especially in developing fetuses, and young children.
